

## Selectors

*	all elements
div	all div tags
div,p	all divs and paragraphs
div p	paragraphs inside divs
div > p	all p tags, one level deep in div
div + p	p tags immediately after div
div ~ p	p tags preceded by div
.classname	all elements with class
#idname	element with ID
div.classname	divs with certain classname
div#idname	div with certain ID
#idname *	all elements inside #idname

### Pseudo classes

a:link	link in normal state
a:active	link in clicked state
a:hover	link with mouse over it
a:visited	visited link
p::after{content:"yo";}	add content after p
p::before	add content before p
input:checked	checked inputs
input:disabled	disabled inputs
input:enabled	enabled inputs
input:focus	input has focus
input:in-range	value in range
input:out-of-range	input value out of range
input:valid	input with valid value
input:invalid	input with invalid value
input:optional	no required attribute
input:required	input with required attribute
input:read-only	with readonly attribute
input:read-write	no readonly attrib.
div:empty	element with no children
p::first-letter	first letter in p
p::first-line	first line in p
p:first-of-type	first of some type
p:last-of-type	last of some type
p:lang(en)	p with en language attribute
:not(span)	element that's not a span
p:first-child	first child of its parent
p:last-child	last child of its parent
p:nth-child(2)	second child of its parent
p:nth-child(3n+1)	nth-child (an + b) formula
p:nth-last-child(2)	second child from behind
p:nth-of-type(2)	second p of its parent
p:nth-last-of-type(2)	...from behind
p:only-of-type	unique of its parent
p:only-child	only child of its parent
:root	documents root element
::selection	portion selected by user
:target	highlight active anchor

### Attribute selectors

a[target]	links with a target attribute
a[target="_blank"]	links which open in new tab
[title~="chair"]	title element containing a word
[class^="chair"]	class starts with chair
[class]="chair"]	class starts with the chair word
[class*="chair"]	class contains chair

## Basics

### Syntax

```
selector{
  property: value;
  property2: value2;
}
```

### Include external css file

```
<link rel="stylesheet" type="text/css" href="/style
```

### Internal styles

```
<style type="text/css">
  div { color: #444;}
</style>
```

### Inline styles

```
<tag style="property: value"> </tag>
```

### Clearfix

```
.clearfix:after {
  clear: both;
  content: " ";
  display: block;
  font-size: 0;
  height: 0;
  visibility: hidden;
}
.clearfix { display: inline-block; }
* html .clearfix { height: 1%; }
.clearfix { display: block; }
```

### Box model

margin  
border  
padding  
content

## Properties

align-content	behavior of the flex-wrap property
align-items	alignment for items inside the container
align-self	alignment for the selected item
all	changes all properties
animation	binds an animation to an element
animation-delay	delays animation start
animation-direction	reverse animation or in alternate cycles
animation-duration	animation duration in seconds or ms
animation-fill-mode	style when the animation is not playing
animation-iteration-count	number of an animation replay
animation-name	name for the @keyframes animation
animation-play-state	the animation is running or paused
animation-timing-function	speed curve of an animation
backface-visibility	

`[class$="chair"]` class ends with chair  
`input[type="button"]` specified input type

## Color Picker

One line

```
background: #D0E4F5  
url("https://htmlcheatsheet.com/images/logo-css.png")  
no-repeat scroll 0 0;
```

## Gradient

is element visible when not facing the screen

### background

all background properties in one declaration

### background-attachment

is the background image fixed or scrolls

### background-blend-mode

blending mode of each background layer

**background-clip** painting area of the background

**background-color** background color

**background-image** background image

### background-origin

where the background image is positioned

### background-position

starting position of the background image

### background-repeat

the way the background image is repeated

**background-size** background image size

**border** sets all border properties in one line

**border-bottom** bottom border properties in one line

**border-bottom-color** color of the bottom border

**border-bottom-left-radius** border bottom left radius

**border-bottom-right-radius** border bottom right radius

**border-bottom-style** border bottom style

**border-bottom-width** border bottom width

**border-collapse** border collapse

**border-color** border color

**border-image** sets an image as border

### border-image-outset

border image area extends beyond the border box

### border-image-repeat

border image repeated, rounded or stretched

**border-image-slice** how to slice the border image

**border-image-source** path to the border image

**border-image-width** border image width

**border-left** left border properties in one line

**border-left-color** border left color

**border-left-style** border left style

**border-left-width** border left width

### border-radius

border radius of the four rounded corners

**border-right** right border properties in one line

**border-right-color** border right color

**border-right-style** border right style

**border-right-width** border right width

**border-spacing** border spacing

**border-style** border style

**border-top** top border properties in one line

**border-top-color** border top color

**border-top-left-radius** border top left radius

**border-top-right-radius** border top right radius

**border-top-style** border top style

**border-top-width** border top width

**border-width** border width

### bottom

bottom offset for relative and absolute elements

**box-shadow** shadow to element

**box-sizing** box sizing properties

**caption-side** placement of a table caption

**clear** deny floating of an element

**clip** clip an absolutely positioned element

**color** text color

**column-count** divide the content in columns

**column-fill** balanced fill or not

**column-gap** gap between the columns

### column-rule

separator between columns, like border

**column-rule-color** column rule color

**column-rule-style** column rule style

**column-rule-width** column rule width

**column-span** column span

Middle transition

HEX Codes

```
background: #1C6EA4;
background: -moz-linear-gradient(left, #1C6EA4 0%, #2388CB 50%, #144E75 100%);
background: -webkit-linear-gradient(left, #1C6EA4 0%, #2388CB 50%, #144E75 100%);
```

Change gradient, shadow, font and border in other panels.

CSS Button

```
.myButton {
color: rgb(255, 255, 255); font-size: 16px; line-height: 16px; padding: 6px; border-radius: 10px; font-family: Georgia, serif; font-weight: normal; text-decoration:
```

<b>column-width</b>	column width
<b>columns</b>	set column-width and column-count
<b>content</b>	insert content :before and :after elements
<b>counter-increment</b>	count sections
<b>counter-reset</b>	reset counter
<b>cursor</b>	cursor type when element is hovered
<b>direction</b>	writing direction, Arabic is using rtl
<b>display</b>	box display type
<b>empty-cells</b>	hide borders and background on empty table cells
<b>filter</b>	image effects: grayscale, blur, invert etc.
<b>flex</b>	item length, relative to others inside the container
<b>flex-basis</b>	initial length of a flexible item
<b>flex-direction</b>	direction of the flexible items
<b>flex-flow</b>	shorthand for flex-direction and flex-wrap
<b>flex-grow</b>	how much the item will grow relative other items
<b>flex-shrink</b>	how to shrink the item relative to other items
<b>flex-wrap</b>	wrap flexible items
<b>float</b>	float elements left or right
<b>font</b>	all font properties in one line
<b>@font-face</b>	declare non-web-safe fonts
<b>font-family</b>	font of the element
<b>font-size</b>	font size
<b>font-size-adjust</b>	control font size if the first declared option is not available
<b>font-stretch</b>	widen or narrow text
<b>font-style</b>	font style: normal, italic, oblique
<b>font-variant</b>	set small-caps
<b>font-weight</b>	use bold or thin characters
<b>hanging-punctuation</b>	can a punctuation mark be placed outside the line box?
<b>height</b>	height of the element
<b>justify-content</b>	justifies flexible container's items horizontally if necessary
<b>@keyframes</b>	specifies the animation code
<b>left</b>	left offset for relative and absolute elements
<b>letter-spacing</b>	space between characters
<b>line-height</b>	line height of text or inline-block elements
<b>list-style</b>	all list properties in one line
<b>list-style-image</b>	replace the list item marker with an image
<b>list-style-position</b>	list item markers inside or outside the content flow
<b>list-style-type</b>	set the type of the list item marker
<b>margin</b>	set the top, right, bottom and left margins in one line
<b>margin-bottom</b>	bottom margin
<b>margin-left</b>	left margin
<b>margin-right</b>	right margin
<b>margin-top</b>	margin top
<b>max-height</b>	maximum height of element
<b>max-width</b>	maximum width of element
<b>@media</b>	see media queries
<b>min-height</b>	minimum height
<b>min-width</b>	minimum width
<b>nav-down</b>	where to navigate when the the arrow-down button is pressed
<b>nav-index</b>	sets sequential navigation order
<b>nav-left</b>	where to navigate when the the arrow-left button is pressed
<b>nav-right</b>

```

where to navigate when the the arrow-right button is pressed

**nav-up**

where to navigate when the the arrow-up button is pressed

**opacity**

transparency level of an element

**order**

reorder elements in a container

**outline**

draw an outer border around element

**outline-color**

outline color

**outline-offset**

gap between the element and the outline

**outline-style**

outline style

**outline-width**

outline width

**overflow**

hide, display or scroll if the content overflows its container

**overflow-x**

horizontal overflow

**overflow-y**

vertical overflow

**padding**

padding between the element border and content

**padding-bottom**

padding bottom

**padding-left**

padding left

**padding-right**

padding right

**padding-top**

padding top

**page-break-after**

adds page break after an element

**page-break-before**

adds page break before an element

**page-break-inside**

allow page break inside an element

**perspective**

how many pixels the 3D element is placed from the view

**perspective-origin**

where is the 3D element based in the x- and y-axis

**position**

positioning type: absolute, fixed, relative, static

**quotes**

set quotation marks to wrap an element

**resize**

declare resizable elements

**right**

right offset for relative and absolute elements

**tab-size**

tab character space length

**table-layout**

table layout algorithm

**text-align**

horizontal alignment of text

**text-align-last**

horizontal alignment of last line of text

**text-decoration**

underline, underline or line-through the text

**text-indent**

indentation of the first line of the text

**text-overflow**

the way how overflowed content is marked (ellipsis)

**text-shadow**

text shadow

**text-transform**

capitalization of text

## Transform

Scale:   x

Rotate:   deg

X:   px

Y:   px

Skew X:   deg

Skew Y:   deg

```
-moz-transform: scale(1.3) rotate(41deg)  
translate(8px, 8px) skew(12deg, 20deg);  
-webkit-transform: scale(1.3) rotate(41deg)  
translate(8px, 8px) skew(12deg, 20deg);
```

## Border / outline

Border Outline

## Media Queries

### Syntax

```
@media not|only mediatype and (media feature) {  
  CSS Code  
}
```

Link external file:

```
<link rel="stylesheet" media=mediatype and|not|only
```

### Viewport is 480 pixels or smaller

```
@media screen and (max-width: 480px) { }
```

### Viewport width smaller OR height smaller

```
@media screen and (max-width: 600px), (max-height:
```

### Print style

```
@media print { ... }
```

### Night / dark mode

```
@media (prefers-color-scheme: dark) { ... }
```

### Media types

all, print, screen, speech

### Media features

width	viewport width
height	viewport height
orientation	orientation of the viewport
aspect-ratio	ratio between width & height
color	number of bits per color
color-index	number of displayable colors
monochrome	color on greyscale device
resolution	resolution of the device
scan	scanning process of the device
grid	device is a grid or bitmap
